

SMS sterile field change for

- Skin Lesion Packs

Temporary Changes to Ensure Continuity of Supply

Shortages and volatility of pricing for SMS have required us to make temporary changes in the materials used in the production of sterile fields. Please be assured that the SMS sterile field has been replaced with a temporary alternative of equal or better specification. While the alternate material used may look and feel different, its clinical performance is the same.

Temporary Change Details		
PRODUCT	PRODUCT CODE	APPLICABLE BATCH NUMBERS
Skin Lesion Pack	00-007A	8313920, 8320320
Skin Lesion Pack	08-884A	8317520

Q Do I need to do anything?

A No. Packs will automatically roll out once current stocks on hand are depleted.

Q How long will this measure be in place?

A Only limited batches of product will be affected and the return to the original specification will be fast.
